

Civil Engineering

TKW's civil engineering staff manages all facets of land development design, from remodeling and expansion to complete, undeveloped site master planning. Staff expertise encompasses every project stage, beginning with feasibility studies, design and permitting phases, and continuing through to completion of construction.

Since its inception in 1989, TKW has provided world-class engineering consulting services for government and private development. In-house departments offer industry expertise in civil, environmental, and structural engineering, surveying and GIS services to clients throughout Florida and nationwide.
