

Surveying, Mapping & GIS Services

TKW offers a full range of surveying services. Our surveyors use state-of-the-art electronic equipment, including GPS sub-centimeter capability, and software to provide an accurate, high quality product. In line with the firm's commitment to personalized service, internal procedures ensure that clients always have a direct line of communication with management and an immediate response to their requirements.

For additional information about our Survey & GIS Departments, please contact: inquiry@tkwonline.com
